Journal of
Thermal Stresses
AN INTERNATIONAL QUARTERLY

VOLUME 9
NUMBER 1
1986

Contents

1 Thermal Stresses in an Infinite Plate with a Pair of Circular Inclusions under Steady-State Temperature (Case of Infinite Plate having a Pair of Heat Sources) Shunsuke Shioya and Syozo Tsuruno

19 Thermoelastic Transient Response of an Infinitely Long Annular Cylinder Yu-Ching Yang, Ting-San Wang, and Cha'o-Kuang Chen

31 Inelastic High-Temperature Thermomechanical Response of Ceramic Coated Gas Turbine Seals Joe Padovan, Dan Dougherty, and Bob Hendricks

45 Approximate One-Dimensional Solution in Linear Thermoelasticity with Finite Wave Speeds Jacek Gladysz

59 Numerical Analysis of Thermal Stresses in a Nonlinear Thermoelastic Thick Cylindrical Shell and Cube Tomasz Jekot

69 Nonuniqueness and Stability for Heat Conduction through a Duplex Heat Exchanger Tube J. R. Barber

79 Domain of Influence Theorem in Thermoelasticity with One Relaxation Time Josef Ignaczak, Bruno Carbonaro, and Remigio Russo

93 Publications on Thermal Stresses

NUMERICAL HEAT TRANSFER

Vol. 9 No. 4
1986

An International Journal of Computation and Methodology

CONTENTS

381 A Mixed Implicit-Explicit Variable Grid Scheme for a Transient Environmental Ice Model John F. Dilley and Noam Lior

403 Finite-Element Enthalpy Method for Discrete Phase Change A. M. Cames-Pintaux and M. Nguyen-Lamba

419 Heat and Mass Transfer at an Upstream-Facing Blunt Face Situated in a Uniform Oncoming Flow S. S. Kang and E. M. Sparrow

441 Combined Buoyancy- and Thermocapillary-Driven Convection in Open Square Cavities T. L. Bergman and S. Ramadhyani

453 Second-Order Upwind Differencing Method for Nonisothermal Chemical Transport in Porous Media C. H. Lai, G. S. Bodvarsson, and P. A. Witherspoon

473 Nonisothermal Mass Transport in a Flat Conduit for Flow of Non-Newtonian Liquid Helmut F. Bauer

495 The Axisymmetric, Turbulent, Buoyant Jet—Numerical Solution for a Semiempirical Theory Graham Wilks and Roland Hunt

Index to Titles

Boiler water wall, use of four-ribbed tubes for improved heat transfer in, 39(4)
Compact tube and plate-finned heat exchangers, 44(1)
Convective heat transfer, optimum arrays of longitudinal, rectangular fins in, 68(3)
Electric glass furnaces, three-dimensional mathematical model for flow and heat transfer in, 55(4)
Engineering education in heat transfer, 35(3)
Evaporative heat exchangers, performance simulation of, 31(2)
Extremely compact cross-flow heat exchanger, construction of and measurements with, 39(2)
Four channel plate heat exchanger, temperature distribution in, 58(2)
Four-ribbed tubes, for heat transfer improvement, in boiler water wall tubes, 39(4)
Heat exchangers, thermal effectiveness of, involving manufacturing inaccuracies and deformation of tube bundles, 52(1)
Heat transfer education, 19(3), 26(3), 35(3)
Heat transfer equipment, computer calculation and parameter optimization of, 39(1)
Impedance pipe heating, 53(3)
Laminar forced-convective heat transfer and flat rectangular ducts, 31(4)
Learning and teaching heat transfer, 26(3)
Multipassage heat exchanger performance, effect of flow maldistribution on, 45(4)
Power plant spray cooling modules and systems, performance of, 60(3)
Shell-and-tube heat exchangers, computer techniques for analysis of, 40(3)
Shell-and-tube heat exchangers with roughened tubes and smooth shell surface, predicting pressure drop in, 26(1)
Shell-side heat transfer coefficients, determination of, by naphthalene sublimation technique, 19(2)
Tube banks, efficiency parameters for heat transfer in, 19(1)
Twisted-tape swirl generators, in two-phase flow heat exchangers, 19(4)
Two-phase flow in heat exchangers and pipelines, 48(2)
Two-phase flow heat exchangers, effect of twisted-tape swirl generators in, 19(4)
Undergraduate education in heat transfer, 19(3)
Viscous fluids, high-performance convective surfaces for, 31(1)
